

Finance and Accounting for Non-Financial Managers - 3 Days

Course 280 Overview

- You Will Learn How To**
- Integrate financial concepts and policies into the management decision and budgeting process
 - Evaluate the meaning of income statements and balance sheets
 - Employ cash flow analysis to assess business status
 - Calculate the cost of business activities
 - Control business operations through effective budget management
 - Communicate effectively with financial executives and staff

Course Benefits All too often, a manager's performance is measured by how effectively they oversee departmental budgets. To succeed as a nonfinancial manager, knowledge of basic financial principles and the budgeting process is critical. This course transforms financial and accounting concepts into decision-making tools you can use successfully every day. You learn to apply the fundamentals of finance to improve budget management, increase potential profits, and assess the financial performance of business activities.

Who Should Attend Nonfinancial managers and anyone who wants to develop their knowledge of financial practices to improve their managerial skills.

Workshop Course Case studies reinforce the fundamentals of finance presented throughout the course. Participants work in teams to gain experience in:

- Analysing and creating profit and loss accounts, balance sheets and cash flow statements
- Establishing and managing realistic operating budgets
- Calculating a budget to achieve stated financial goals
- Applying financial principles to real-world situations

Finance and Accounting for Non-Financial Managers - 3 Days

Course 280 Outline

Why Finance Matters

- Demystifying financial jargon
- Generally Accepted Accounting Principles (GAAP)
- Accountability and responsibility for financial information

The Key Building Blocks of Financial Control

Decoding the profit and loss account

- Differentiating income, operating and capital expense items
- Putting the pieces together to measure profit and business success
- When a sale becomes a sale: sales recognition

Analysing the balance sheet

- Evaluating the worth of an established business
- Distinguishing between fixed and current assets and liabilities
- Depreciation and amortisation
- Linking the profit and loss account to the balance sheet
